BACK FOR THE FUTURE

OBJECT CARPET

THE NEW GENERATION OF TEXTILE FLOORINGS. HEALTHY, SUSTAINABLE, LIGHT AND SILENT.

The healthy and ecological carpet backing **WELLTEX®** for the new generation of all SL-Tiles from OBJECT CARPET is the result of our intensive development work. This innovation is not only completely free of bitumen, latex and PVC and improves indoor climate, but also **acoustically even more effective than common SL-Tiles**. Moreover, it **is made of recycled materials** and particularly environment friendly.

Our goal is a floor completely without ecological footprint. Today, OBJECT CARPET products already leave the absolute minimum of waste on our planet. Avoid waste, save resources, and reduce emissions – wherever we can! For such results, we have been awarded many times. All our carpets bear the "Blue Angel" quality seal of the German Federal Environment Agency, meaning they protect environment and health.

People's health and well-being are the focus of our product development.

A healthy climate in the room – especially at the workplace – is of a fundamental importance, since the best performance can only be achieved in a healthy environment. Current studies and investigations – for example, the World Green Building Council – show that **a low-quality indoor air impairs performance of people working in buildings by 8-11 percent**. It is proved by researches, that disturbing noise at workplaces causes illness and productivity losses even by 30 percent. That is why **all our products ensure above-average values with regard to acoustics**.

The motto "BACK FOR THE FUTURE" stands for our holistic goal: to develop and manufacture products which are 100% sustainable and recyclable. This is no empty promise, but a concrete goal on which we, OBJECT CARPET, work together along with many other creative minds from different branches and disciplines on a daily basis. Currently, **70% of the newly developed textile floorings** from OBJECT CARPET **are made of recycled ECONYL®-yarn** manufactured from industrial waste and fishing nets.

Simply better, simply: **Made in Germany**. New requirements and improvement potential by pioneering developments are constantly incorporated into our work. In line with the motto: Be healthy. Be safe. Be happy. Just Be!

**WELLTEX® - FOR A HEALTHY INDOOR CLIMATE:
FREE OF BITUMEN, PVC AND LATEX.
FREE OF ODOURS AND HARMFUL EMISSIONS.**

Less is more! Free of bitumen, latex, and PVC and consistently without illness-causing chemicals – this is the new carpet tile back WELLTEX®, featuring low-odour and low-emission. Low-weight saves transportation costs, is flexible and easy-to-fit. Not visible, but big in effect! Healthy, sustainable, light and silent.

All 48 OBJECT CARPET tile-qualities – the complete collection of OBJECT CARPET – are equipped with the WELLTEX innovative back.

WELLTEX®
BACK FOR THE FUTURE

**HEALTHY. SUSTAINABLE.
LIGHT AND SILENT.**

The OBJECT CARPET SL-Tile backing WELLTEX® – for a healthy working and living environment.

Top layer

Example: **CANYON** –
Collection **PLACES OF ORIGIN**
made of **ECONYL**-yarn

Basic material

Made of **100% recyclable PET**

Fibre and filament binding

Made of **acrylate dispersion – no latex!**

Glue with acrylate dispersion

No bitumen, no PVC!

Cover fleece

Made of **thermal-fixed**
100% recycled PET

Particularly silent

BE HEALTHY

WELLTEX® is free of bitumen, PVC and latex. Extremely low-odour and without disease-causing chemicals – proved by the "Blue Angel" test seal.

BE SILENT

SL-Tiles equipped with WELLTEX® ensure much better acoustic values than conventional tiles.

BE GREEN

WELLTEX® partly consists of recycled material. Each tile weighs only 3.5 kg – and is thus 30% lighter. Less weight means lower transportation costs and less CO2 emissions!

BE HONEST

We rely on our production in Germany and are convinced that quality will prevail – without compromise. Manufactured by OBJECT CARPET. Made in Germany.

BE RECYCLED

70% of all products of the OBJECT CARPET collection are made of recycled ECONYL®-yarn, which is produced of industry waste and fisher nets.

BE SMART

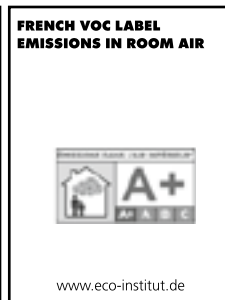

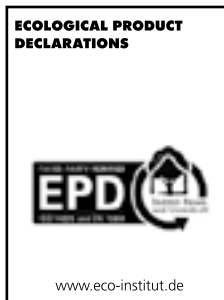

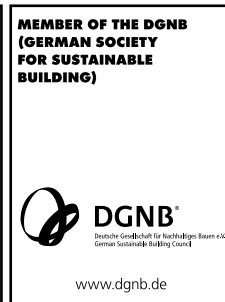

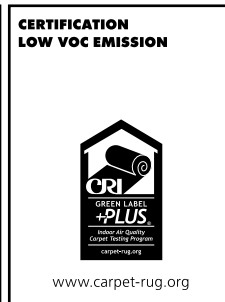

The new, more elastic tile is easier to fit than traditional tiles. You don't need to apply much force and no bitumen is smudged on your cutter.

BE CREATIVE

Shaping spaces for the individual case: SL-Tiles, broadloom, or RUGX – everything from a single source, for efficient service and creative solutions.

BE SAFE

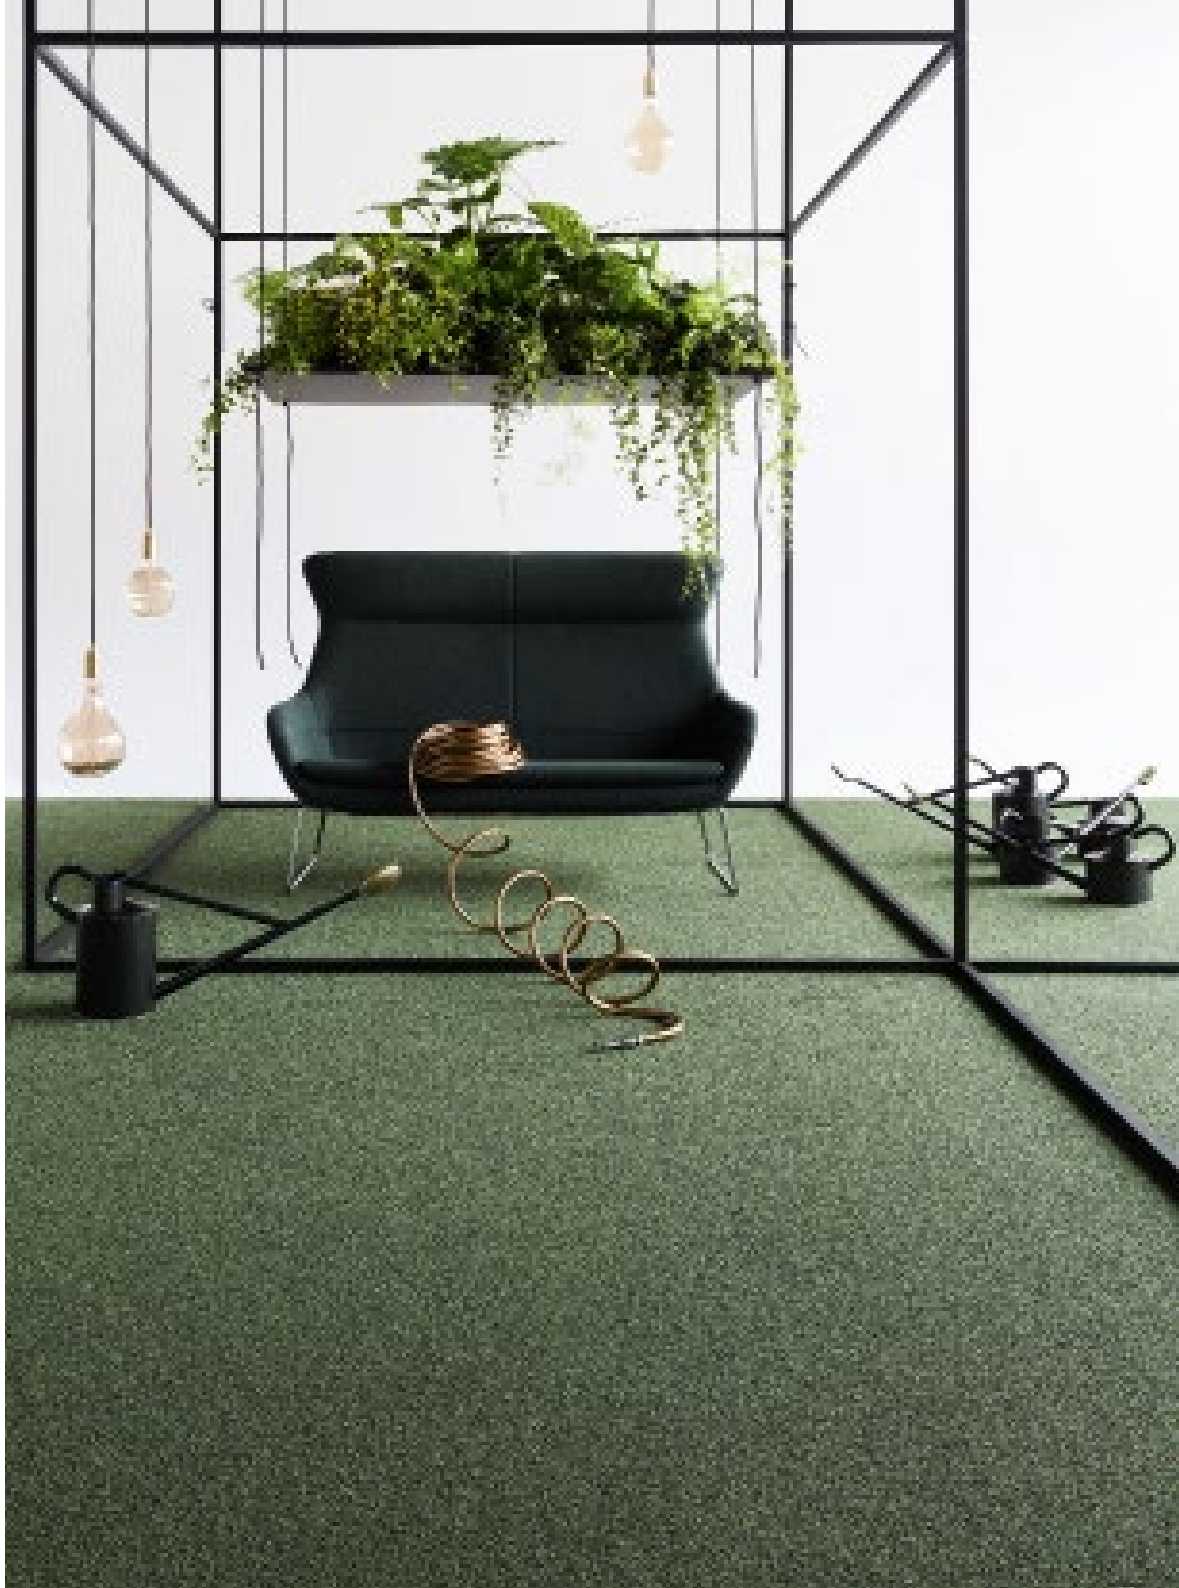

All of these certifications distinguish OBJECT CARPET products as environmentally-friendly and medically-compatible.

BE PROTECTED

All carpets from OBJECT CARPET marked with this symbol have a machined invisible dirt and stain protection finish. The carpet is therefore less sensitive and repels dirt, dust particles and liquids. Care costs are being reduced since the dirt is easier to remove. The carpet lifecycle is extended.

**BE HEALTHY.
BE SAFE.
BE HAPPY...
JUST BE!**

OBJECT CARPET

JUST BE

We realize your visions.
We care about you.
We support you creating outstanding interiors.
We are your partner for probably the best carpets in the world.
