

MEDITERRANEO

INDOOR/OUTDOOR CARPET COLLECTION

BY MATTEO THUN & ANTONIO RODRIGUEZ

OBJECT CARPET

“This fully recyclable collection relieves nature by enabling countless lifecycles. We wanted to highlight the materiality, the feel and the natural aesthetics with their differentiated color tones. The result is a very robust and weather resistant collection that can be used flexibly both indoors and outdoors”, explains Designer Antonio Rodriguez.

The processing of waste into the recyclable MEDITERRANEO collection uses a multi-step approach in which collected, sorted and cleaned waste is turned into polyester chips. Then converted into filament fibers from which the carpet is made.

Compared to the production of carpet from new polyester, this sustainable manufacturing process significantly avoids CO2 emissions. And after its use, MEDITERRANEO can be recycled again and again countless times.

Design CAPRI, Color Sabbia

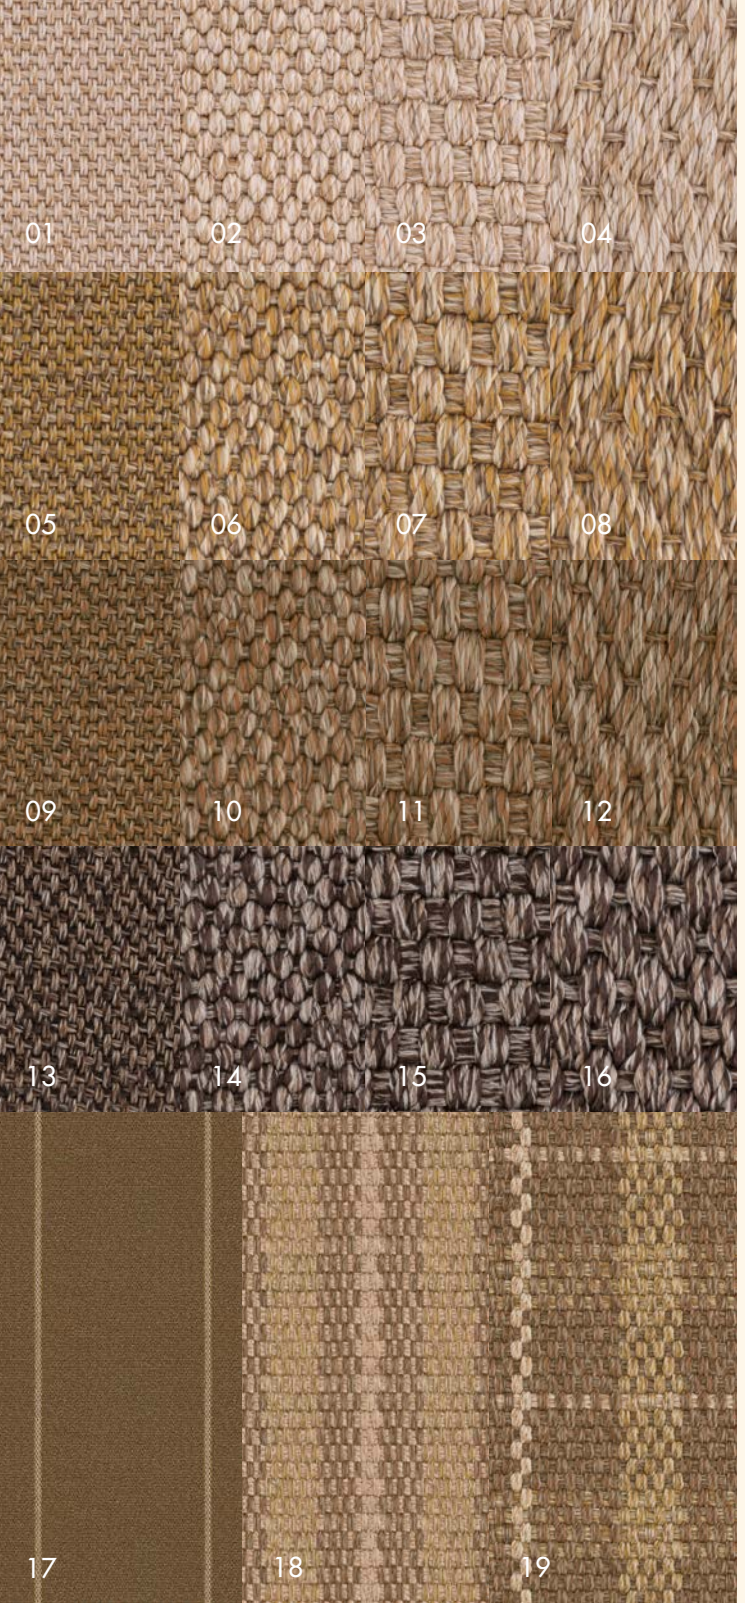

The MEDITERRANEO collection includes a variety of 19 designs with four different weave patterns (MILO, RODI, MENORCA and CAPRI) in four different shades. The patterned designs CORFU, ELBA and MALTA add further dimensions to the collection and reflect its authentic, natural color palette. As standalone carpets (RUGX), they offer many options for in- and outdoor locations. Despite their robust and natural appearance that is reminiscent of rattan, the carpets are surprisingly smooth.

The qualities MILO and ELBA which represent the smallest and most flat pattern are produced on a loom up to 4m width with textile backing. The other qualities – RODI, MENORCA, CAPRI, CORFU and MALTA – instead are limited to 3 m width with a water-permeable finish.

RUGX in standard sizes: ø1,5 m, ø2 m, ø3 m, 1,5x2 m, 2x2 m, 2x3 m, 3x3 m, 3x4 m are usually available within 2 weeks. OBJECT CARPET also provides custommade options on request (4-6 weeks).

With MEDITERRANEO RIVIERA, the distinctive NATURAL BORDER edging gains a creative detail with a significant impact – a vibrant color highlight in Lime, Pink, Aqua, Lava Red, Bordeaux, or Caramel, perfectly combining elegance and expressiveness (see photo).

MEDITERRANEO BORDERS

The natural character of the collection is especially highlighted by the unique NATURAL BORDER edging. The sewn edges with exposed yarn ends reflect the Mediterranean lifestyle and effortlessly meet the demands of robust outdoor use.

The TEXTILE BORDER edging frames the rug with an exclusive textile tape, specially made from the same yarn in the same color.

MEDITERRANEO carpets are very resilient and the perfect solution for both private and public areas: They are easy to clean, dry quickly and are water- and UV-resistant, so they can easily withstand outdoor conditions.

Matteo Thun emphasizes: “As architects, we were waiting to develop a waste-free and entirely recyclable carpet collection that can also be used outside – The result is a beautifully textured and conscious material that belies its humble origins - we are very happy with it!”
